Summary

Computer Engineering student (B.E. graduating 2027, CGPA 8.5) with hands-on software development experience building backend and full-stack applications using **Java, Spring Boot, REST APIs, and microservices**. Built **37 REST endpoints** during an internship and solved **120+ LeetCode problems**, with strong foundations in **DSA, OOP, backend development, and problem solving**.

Technical Skills

Programming Languages: Java (Primary), Python, JavaScript, C++, SQL
Backend Development: Spring Boot 3, Spring MVC, Spring Security (JWT), REST APIs, Microservices
Persistence & Databases: JPA, Hibernate, MySQL, PostgreSQL, MongoDB, Redis
Messaging & API Documentation: Apache Kafka, Swagger/OpenAPI
Cloud & DevOps: AWS (EC2, S3, VPC, IAM), Docker, Kubernetes, Jenkins, CI/CD
Build & Development Tools: Maven, Gradle, Git, IntelliJ IDEA, Visual Studio Code
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP) , Computer Network (CN)

Experience

Java Full Stack Development Intern Jan 2026 – Feb 2026
Shorat Innovations Pvt. Ltd., Pune *Cert. No. SI-INT2025/304*

- Engineered a full-stack Complaint Management System for 3 user roles, implementing **37 REST endpoints**, 10 Spring Boot controllers, and **26 React pages** across a layered controller–service–repository architecture (Java 21, JPA/Hibernate, React 19, Vite).
- Architected role-based access control (**RBAC**) across **32 protected endpoints** with stateless **Spring Security** and **JWT**, eliminating server-side session overhead for horizontal scalability and documenting contracts via **OpenAPI/Swagger**.
- Resolved cross-database enum mapping errors between MySQL and PostgreSQL using custom JPA `AttributeConverters`, standardizing responses across **6 exception types** via a global `@RestControllerAdvice`.
- Streamlined deployment to Render, Supabase, and Vercel by authoring multi-stage Dockerfiles and containerizing services into a reproducible **3-container Docker Compose stack** (MySQL, Spring Boot, Nginx/React).

Java Developer Intern (Industrial Training) Aug 2023 – Nov 2023
Shri Software Solutions & Training Center (MSME, Govt. of India) | during Diploma

- Developed core business logic for complaint lifecycles, department routing, and SLA escalations, delivering **30 REST endpoints** thoroughly validated via Postman within a modular Spring Boot architecture.
- Implemented a polyglot persistence architecture, routing relational complaint and user transactions to **MySQL** via JPA/Hibernate while streaming high-volume audit logs to **MongoDB** via Spring Data.
- Resolved **15+ authentication and validation edge cases**, standardizing system-wide API error responses using centralized `@ControllerAdvice` and rigorous Git code reviews.

Projects

Credential Validator Platform – Microservices-Based Fraud Detection
Spring Boot 3, FastAPI, React, TypeScript, MySQL, Solidity

- Developed a 7-layer fraud engine using Tesseract OCR, OpenCV, SHA-256, and Merkle-root proofs on an Ethereum/Hardhat network, detecting tampered PDFs with **95% accuracy** across a 40-document test suite and verifying **50 documents in ∼20 seconds**.
- Architected a distributed system of **5 independent microservices** (Spring Boot 3, FastAPI, React), integrating JWT-secured RBAC endpoints, multi-tenant MySQL schemas, ZXing QR generation, and automated PDF/ZIP batch verification.

Full-Stack RAG Chat Platform
Next.js, Spring Boot, FastAPI, LangChain, ChromaDB, FAISS

- Engineered an optimized retrieval pipeline using page-aware chunking, ChromaDB, and cross-encoder reranking, achieving **83.3% Recall@5**, **0.83 MRR**, 100% correct abstention, and a **76 ms average latency** on a golden evaluation set.
- Architected a decoupled system across **3 microservices**, implementing a Next.js frontend, a Spring Boot API gateway with JWT security and rate limiting, and a FastAPI backend with SSE-based streaming responses.

Education

Bharati Vidyapeeth's College of Engineering, Lavale, Pune Expected 2027
*Bachelor of Engineering in Computer Engineering | **CGPA: 8.5***
Diploma in Computer Engineering, Yogeshwari Polytechnic, Ambajogai – **88.46%** 2021 – 2024
SSC, Shri Yogeshwari Nutan Vidyalaya, Ambajogai – **95.60%** 2021

Certifications & Training

- **AWS Cloud Computing Workshop** (EC2, S3, VPC, IAM) – Tech Bodhi, Pune (Oct 2024)
- **Advanced Java Programming** – Shri Software Solutions & Training Center (Aug–Nov 2023)
- **AI Applications Workflow using MATLAB** – BVCOE Lavale, with MathWorks (Jan–Feb 2025)
