Summary

Computer Engineering student (CGPA 8.5) with internship experience building REST APIs using Java and Spring Boot. Strong in Spring Security, JPA/Hibernate, SQL, and backend architecture, with hands-on experience developing microservices and document-verification systems. AWS Certified Cloud Practitioner with 120+ LeetCode problems solved.

Technical Skills

Languages: Java (primary), Python, SQL, JavaScript, C++

Backend: Spring Boot 3, Spring MVC, Spring Security (JWT), JPA/Hibernate, REST APIs, Microservices, FastAPI

AI & Data: RAG, LangChain, Vector Embeddings, Semantic Retrieval, Data Cleaning, Exploratory Data Analysis, NumPy, Pandas

Databases: MySQL, PostgreSQL, MongoDB

Cloud & Tools: AWS, Docker, Git, Maven, JUnit, Postman, Swagger

Experience

Java Developer Intern

Jul 2023 – Oct 2023

Shri Software Technologies

- Built REST APIs for a student management module using Java, Spring Boot, and JPA/Hibernate, integrated with MySQL, PostgreSQL, and MongoDB.
- Tested APIs with Postman, fixed bugs, and followed the team's Git workflow and code review process.
- Applied layered architecture, exception handling, and API documentation.

Projects

Credential Validator Platform – Microservices-Based Fraud Detection

Spring Boot 3, FastAPI, React, TypeScript, MySQL, Solidity

- Built a microservices credential validation platform (Spring Boot 3, FastAPI, React 18 + TypeScript, Solidity) running as five services.
- Engineered a 7-layer fraud detection engine using Tesseract OCR, OpenCV, SHA-256 hashing, and Merkle root proofs on a local Ethereum (Hardhat) network to detect modified PDFs within seconds.
- Developed role-based REST APIs with Spring Security (JWT), multi-tenant MySQL schemas, ZXing QR codes, and PDF/ZIP batch verification.
- Tested on 20 genuine and 20 tampered files (95% detection accuracy across grade, seal, and hash edits); batch verification of 50 documents completes in about 20 seconds.

RAG Platform – Document Question Answering

Python, LangChain, FAISS, ChromaDB

- Built a RAG application with Python, LangChain, and vector embeddings for document-grounded question answering.
- Implemented document chunking, embedding generation, and semantic retrieval using FAISS and ChromaDB to improve answer accuracy.
- Performed data cleaning, exploratory analysis, and statistical validation to prepare datasets.

Education

Bharati Vidyapeeth's College of Engineering, Lavale, Pune

Expected 2027

Bachelor of Engineering in Computer Engineering / CGPA: 8.5

Yogeshwari Polytechnic, Ambajogai

2021 – 2024

Diploma in Computer Engineering / 88.46%

Shri Yogeshwari Nutan Vidyalaya, Ambajogai

2021

SSC Secondary Education / 95.60%

Certifications & Training

- AWS Certified Cloud Practitioner** – Amazon Web Services (2025)
- AWS Cloud Computing Workshop** (EC2, S3, VPC, IAM) – Tech Bodhi & AWS (2024)
- Advanced Java Programming** – Shri Software Solutions & Training Center (2023)
- Python NumPy & Pandas Industrial Training** – Shri Software Solutions & Training Center (2023)
